-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because the drawings are not clear. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (USPN 5620927).

Lee teaches a system for depositing solder balls onto a substrate, the system comprising a horizontal member (20) for holding solder, a rotatable receiving member (12, 27) which is pivotable (col 3 line 60 – col 4 line 2 and col 5 line 58 – col 6 line 19) and a contact member (18) comprising an aligner plate with projections (lip, shelf, latches) for selectively contacting the substrate (col 4 lines 15-32). As shown in figure 3, the base comprises a T shaped structure with an air conduit for pulling a vacuum (col 4 lines 3-14).

4. Claims 1-3, 6-8 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Inoue et al. (US 6460755 B1).

Inoue teaches a system for depositing solder balls onto a substrate, the system comprising a horizontal member (50, col 7 lines 20-33) for holding solder,

a rotatable receiving member (table 41, col 8 lines 6-8) and a contact member (51) comprising an aligner plate with projections for selectively contacting the substrate (col 8 lines 9-19, col 9 line 47 – col 10 line 3 and col 10 lines 51-67 and figures 7, 10 and 11). As shown in figure 8, the base comprises a T shaped structure with an air conduit (col 7 line 65 – col 8 line 8).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cheng et al. (USPN 6766938 B2, rotatable, pivotable receiving member, T-shape), Kohn (USPN 5613632, rotatable receiving member), Cobbley et al. (USPN 6533159 B1) and Hazeyama et al. (US 2002?0135064 A1).
